One of the following statements will appear on the 2\textsuperscript{nd} course test. Using the formal paragraph structure taught in class as well as your notes and any other resources you have access to, prepare answers to both. One the day of the test, you will have to answer one of these. Cheat sheets are not allowed BUT, jotting down information on the lined paper I hand out during the test is fine.

Remember that 3 marks are for following the structure and 7 marks are for content. In respect to content, name dropping is only level 1/level 2 (at the most)...for a level 3/level 4 you must be able to explain with examples from the course what you are talking about. So, if you were asked a question about Canada’s efforts to contain the communist threat during the Cold War and you dropped the names of the DEW Line, NATO, and NORAD but didn’t tell me what they did and Canada’s role in them, the best you could do would be a level 2.

**Statement 1**

Canada’s efforts on the world stage to fight tyranny, and later on promote peace (from 1939 – 1998) have largely gone unrecognized. Making reference to 3 specific instances from this period, answer this question.

**Statement 2**

Explain why it is important to know about our Country’s prime ministers making reference to John Diefenbaker, Lester B Pearson, and Pierre Elliot Trudeau.
