Canada in the Cold War Activity

Use the internet to research the following and organize your answers into a chart so that you can compare them as you review for the 2nd test.

You need to research the following:

1) NATO
2) NORAD
3) DEW and Pine Tree Line

For each of these you want to make note of when they started and how long they existed for, who is involved in each, and a brief summary of what each one does and why it was necessary. In regard to NATO, only list the founding members as it has grown considerably since the end of the Cold War.

Once you have completed the above, do the same thing (chart wise that is) but for the following:

1) Suez Canal Crisis
2) Korean War

In these cases you need to know when each one started and how long it lasted, why it happened, Canada’s role in it, and the outcome.
