

Culminating Project

There have been some classic movies produced by Hollywood that entail time travel: Time Bandits (some kid and a bunch of little people) travel through various moments in history on a quest, The Final Countdown (an aircraft carrier from the 80's is transported back in time to the eve of the attack on Pearl Harbour....you can imagine how Zero's do against F-14 Tomcats), and Hot Tub Time Machine (a cinematic master piece). For this assignment you are going to take yourself back in time (through the time period of this course) and provide proof that you were there. To do this you will need to use whatever computer software you have to superimpose your likeness at the events you choose, or with the people you choose to meet. You need to choose a balance of people and events from the course time period (5 events and 5 people). This is an independent presentation and for one you have you must provide a reason for choosing this person, place or event (who or why it is important to you to know about). So, you can't say that you went back in time to meet Doris Anderson because she was a cool lady

This culminating task will assess your knowledge and understanding, communication, and application skills, be marked out of 50, and graded with the following marking scheme. Use whatever computer software you desire to create this assignment, just make sure it can open on your presentation date.
